MATTHEW OVERBY

mattoverby@gmail.com | mattoverby.net | mattoverby | mattoverby

Research Interests: Physics-Based Animation, Geometry Processing

EDUCATION

Doctor of Philosophy in Computer Science — Expected February 2022
University of Minnesota — *Advisor: Rahul Narain*

Master of Science in Computer Science — November 2014
University of Minnesota Duluth — *Advisor: Pete Willemsen*

Bachelor of Science in Computer Science, Minor in Mathematics — December 2011
University of Minnesota Duluth

EXPERIENCE

Amazon – Applied Science Intern — Summer 2021 & Fall 2021
Seattle, Washington, USA (remote) — *amazon.science*
- Fashion innovation technology

z-emotion – Independent Contractor, Software Engineering — September 2020 – May 2021
Seoul, South Korea (remote) — *z-emotion.com*
- Develop cloth simulation algorithms for interactive garment design

Abobe – Creative Intelligence Lab Intern — Summer 2018 & Summer 2019
Seattle, Washington, USA — *research.adobe.com*
- Research methods for geometry optimization and collision response

Digital Domain – R&D Software Engineering Intern — Summer 2017
Vancouver, British Columbia, CA — *digitaldomain.com*
- Research and develop animation tools for simulating muscle and skin

University of Utah – Research Computer Scientist — Spring 2015
Salt Lake City, Utah, USA — *mech.utah.edu/∼pardyjak*
- Research and develop microclimate simulation algorithms with GPGPU

Talks, Abstracts, and Posters

GPU Accelerated Surface Energy Balance Computations for Urban Environment Simulation. AMS Symposium on High Performance Computing for Weather, Water, and Climate. Phoenix, AZ. January 2015.

QUIC EnvSim: Radiative Heat Transfer in Vegetative and Urban Environments with NVidia Optix. GPU Technology Conference. San Jose, CA. March 2014.

Simulating Radiative Transport for Vegetation in Complex Urban Environments with Green Infrastructure. AMS Symposium on the Urban Environment. Atlanta, GA. February 2014.
Awarded best student presentation.

A Highly Scalable Modeling Framework Based on GPU Technology for Simulating Radiative Transport in Complex Urban and Plant Canopies. ESA Sustainability: Urban Systems. Minneapolis, MN. August 2013.

Modeling Vegetative Heat Transfer in Urban Environments with OptiX. GPU Technology Conference. San Jose, CA. March 2013.

Technical Skills

Preferred Languages: C++, Python, Perl
Libraries/Frameworks: Eigen, GPGPU (CUDA), Intel MKL & TBB, OpenGL, OpenMP
Applications/Tools: CMake, Git, LaTeX, Linux, Mathematica, MATLAB, MS Visual Studio, SVN

Activities

Google Summer of Code – Blender Foundation, 2020

SIGGRAPH Student Volunteer, 2017
